Idaho received \$20.7 million in UI revenues in November, up 18.4 percent over the same month last year while net UI benefits paid out were down -18.5 percent. The resulting balance of \$224.4 million was 10.5 percent above last year and the highest level posted since December 2003. We can expect a normal seasonal decline in December but should end the year with a balance in the \$208 to \$212 million range.
